VOL. XXV, NO. 263 GAINESVILLE, FLORIDA, SUNDAY, JANUARY 17, 1909 TEN CENTS A WEEK

HAINS IS GUILTLESS OF MURDER OF ANNIS

His Liberation May Mean That Capt. Hains Will Be Freed Without a Trial.

FLUSHING, N. Y., Jan. 16.—After reviewing the evidence for twenty-two hours and taking fifteen ballots before all were agreed, the jury in the trial of Thornton Jenkins Hains this afternoon found the prisoner not guilty as a principal with his brother, Capt. Peter C. Hains, Jr., in the killing of William E. Annis.

For the second time in his life Thornton Hains has been found not guilty of the charge of murder, as he was acquitted of murder in shooting a companion named Edward A. Hannigan in an open boat in Hampton Roads seventeen years ago.

Thornton Hains had an affecting greeting with Capt. Hains in the Long Island jail, whither he hurried in a motor car after the verdict to take his brother the news. Old Gen. Hains and his wife, who had been anxiously waiting to learn the verdict in the Hotel Astor, in Manhattan since the jury went out last night, heard the news from their son, Thornton, who telephoned his parents as soon as he left the court room. Mrs. Hains nearly fainted from joy.

Cheers Greet the Verdict.

After spending nearly an hour with Capt. Hains in the jail, Thornton Hains went to the Hotel Astor, where he remained through the evening and night with his father and mother.

The verdict came unexpectedly and at a time when Justice Crane, believing that a disagreement was likely, had sent for the jurors to learn what progress had been made toward a finding. The former defendant smiled, and tears filled his eyes, and, hurrying to the jury box after Justice Crane had discharged the jurors, he seized their hands and thanked them for their verdict.

Barely in any court of law has such a demonstration been witnessed as that which occurred when the jury made known its verdict. The packed court room of spectators rose as one man and cheered and applauded with such mighty vigor that the gavel falls of Justice Crane on his desk could not be heard.

Before proceeding further, Justice Crane ordered the trial chamber cleared and the spectators put out in the street.

After telephoning his mother and father, Thornton was escorted to a local hotel, while a throng of townspeople gave him a continuous greeting en route.

May Free Capt. Hains.

Jurors stated that the first ballot stood 8 to 4 for acquittal, and early this morning the ballot showed a gain of one for acquittal. Jurors Hecker, Johnson, Richmond and Boening voted for conviction of murder. Juror Boening held out until the final ballot was taken just after Justice Crane had sent for the jurors, and then changed his vote to acquittal, making the jury unanimous.

Officials of the district attorney's office in Queen county were quoted yesterday as saying that the verdict in the case probably means that Capt. Hains will never be brought to trial, and that he will be surrendered into the care of his family or the federal government.

"Under this verdict it is perfectly safe for any person who is ingenious enough to frame up a defense to go out and kill. Private vengeance seems to have taken precedence over the people's law," was the only comment that Prosecutor Darrin had to make on the jury's return.

Gainesville's Rapid Growth.

J. E. Dolan, representing the Babcock Printing Press Company, was among the arrivals in the city yesterday. This is his first visit to the city since the fire that destroyed The Sun building about nine years since, when he came for the purpose of selling us a new press. He was more than surprised at the growth and the phenomenal change in the city since his last visit and remarked that it seemed impossible that we should have grown so.

Hertel as Manager.

W. H. Hertel has accepted a position with the White House and will act in the capacity as manager of this new and up-to-date place, assuming charge at once. Having formerly been engaged in this same line of work he has a large number of friends among the traveling public who will be delighted to again meet him in his old vocation.

Sea Island Cotton Was Not So Active Past Week

SAVANNAH, Ga., Jan. 16.—The good demand noted for Sea Island cotton at the close of the previous week continued early in the present week, but as it became satisfied the market ruled progressively quieter, and closed quiet. In addition to the receipts a good deal of holding cotton came on the market, so that the offerings were more than enough to supply the demand. Quotations remain unchanged, but there was only a small enquiry for full choice Georgia and Florida, and extra choice Florida. Full choice was quoted at 16c.

The census report showed 86,016 bales ginned to Jan. 1, distributed by States, as follows:

Georgia	41,037
Florida	32,798
South Carolina	12,181

The quality of the cotton now coming in is mostly poor and discolored.

Sales for the week were 1,106 bales.

The following prices are based on factors' quotations and are revised weekly on Fridays:

Fancy Floridas	19 @20
Fancy Georgias	19 @20
Extra choice Floridas	17½@18
Extra choice Georgias	17½
Choice Ga's. and Fla's	14½@15
Extra fine Ga's and Fla's	14
Fine Ga's. and Fla's	12
Com. Ga's. and Fla's	10 @11

CHARLESTON, S. C., Jan. 16.—Sea Island market, steady; fine, 20c; fully fine, 22c; extra fine, 23c Receipts, 264; exports, 511; sales, 800; stock, 3,991.

MISS DORIAN ELLIS RETAINS GOOD LEAD

CATHERINE HAILE RETAINS SECOND PLACE BY GOOD MARGIN.

Misses Dupree and Ellis Received Same Vote Saturday—How to Obtain 50,000 Extra Votes.

Every day that passes lends more interest to the piano contest. Last night over three hours was spent in counting the large vote that was cast yesterday.

To make the race more interesting we have just received information that we may be allowed to offer extra inducements for the candidates to work on subscriptions to The Sun.

We will give 50,000 votes extra to the contestant who secures the largest number of new subscribers to The Sun from now until the 1st of March, and 25,000 to the next largest. Not less than 20 subscribers to count in this offer.

Following is the standing of the candidates after yesterday's count:

The Exposition-Fair.

In this issue appears a large advertisement of the Florida Exposition-Fair, which opens in Jacksonville on Wednesday, January 20th, and will continue for sixty days. We are assured by the management of this enterprise that it will be the best exposition of Florida's resources that has yet been held in the State. In this connection we desire to call attention to the following editorial in reference to the Exposition, which appeared in The Times-Union of Wednesday, January 13th:

"The management of the Florida Exposition-Fair nave arranged for a display and for entertainments that will be a credit to Jacksonville and to Florida and will prove of value to both. The undertaking is meeting with such a liberality of support as makes great accomplishments possible for the entertainment of the public.

"One week from today the gates will open and besides the hippodrome and other displays the strains of the finest concert band in America will be heard for sixty days. The spirit of the management of this exposition can best be judged by the fact that it has secured, not one of the best, but the very best concert band in America for one of its permanent features. The same spirit goes through the entire work. The management has done the best everywhere that its opportunities made possible."

THE IMPORTANT PART THAT TIMBER PLAYS

Importance of Preserving Same for Use in Mining Enterprises Not Generally Known.

WASHINGTON, D. C., Jan. 15.—"Few persons not directly interested in mining realize the extent to which timber is used in this very important industry," said a Government expert in preservation of mine timber who had just returned to Washington from the West. "The average man has only a vague understanding of the importance of the part that timber plays in the mining industry, and seldom thinks of the enormous quantities required each year to prevent the caving of the over-hanging ground and to keep clear the main working passages of mines.

"There are two general classes of such timbers," he continued, "the first is used in bracing the 'stopes,' as they are called, where the ore is being taken out. As the ore is mined the surrounding rock is held in place by bracing it with heavy timbers, 'framed' into rectangular 'sets.' When ore directly above the first set is removed a second set is built in on top, and so on. The service of these timbers ends when the ore is exhausted and the active mining transferred to another vein or ore-body.

"After a time these timbers decay to a point where the pressure of the rock walls crushes them, and a 'cave-in' occurs. This causes no damage if, as I have said, the mining work has been finished; but it sometimes happens that decay has weakened the timbers to such an extent that the 'cave-in' occurs prematurely, and then lives are sacrificed. In such cases the remaining ore is also a loss, for when the ground has once commenced to move or 'work,' as the miners call it, it is almost impossible to clean it out and hold back the rock so that the remaining ore may be obtained.

"But of still greater importance is the second class of timbers used in the main working openings, tunnels, shafts, etc., which are to be maintained for as long a time as possible. Timbers for this service are chosen not only for their strength and firmness, but also for their ability to resist decay.

"In nine cases out of ten, when timbers are crushed, the indirect cause is decay, produced by low forms of plant life. The dwindling of our timber supply has driven consumers of wood all over the country to study decay and its prevention, and it is safe to say that in the very near future we shall see many more mines putting in small plants for the treatment of their timbers, after the pattern of the plants that have been designed and installed for this purpose by the United States Forest Service. By treating the permanent timbers with some one of the various preservatives they may be made to resist decay almost indefinitely. The additional cost is slight.

"Not only this, but since timber when it is once treated retains its original strength, many of the so-called 'inferior timbers' which have hitherto been considered almost valueless because they decay rapidly, will find wide use in many localities. Such species are loblolly pine and, to a certain extent, shortleaf pine, Engelmann spruce, fire-killed lodgepole pine, white fir, and many other more local timbers.

"The first of the treating plants for mine timbers was put up by an Eastern coal company, after extensive experiments in co-operation with the Forest Service, which demonstrated the practical value of the treatments. Since then other plants have been installed in different parts of the country, two of the latest being in the Coeur d'Alene lead district of Northern Idaho, where, while there is an ample timber supply for some time to come, the treatment is warranted by the high labor cost of replacing timber sets. The added cost of treating timbers is from 10 to 25 per cent of the original cost.

"An interesting point in the problem of wood preservation is the spread of decay in old workings, caused by infection from nearby timbers. A fresh green post, placed between two sticks that are already 'sick,' will become infected and decay much more rapidly than if it were isolated. The contagion is similar to that of the ills that man is heir to, although it usually works more slowly. In one large mine a two-mile tunnel was completed eight years ago, and during the first four years the timber stood up in fine shape. Then signs of decay began to creep in here and there, and since then the disease has extended throughout the entire length of the tunnel, necessitating an annual expenditure of between four and five thousand dollars for replacing timbers rendered useless through decay. Less than one-fourth of this sum goes for timber, the remainder representing the cost of framing and installing. Unquestionably many of the cave-ins which crush the timber and block the mine tunnels, often causing many deaths, are due to nothing but wood decay.

"The work of treating mine timbers is considered of such importance that one group of men in the Forest Service gives its entire attention to this subject. Investigative work carried on by this branch of the service since it was organized has demonstrated that treating with an efficient preservative will prolong the life of timber indefinitely, in places where before it was subject to a rapid decay, and the interest shown by the large consumers of timber and their eagerness to supply the information that has been obtained to their own particular problems, has been widespread and indicative of the benefits of wood preservation."

Cards of Thanks.

The ladies of the Cemetery Association desire to thank Mr. Theo Hudgins and the caste associated with him for the handsome sum of $47.25 derived by the association from the presentation of the talentedly presented and highly entertaining play, "Charley's Aunt," at the opera house on Friday night. They also desire to thank Mr. Chris. Matheson for his valuable services in looking after the business end of the affair.

Editor Sun—I have used so much of your space and met with so much kindness and courtesy from your entire office, from the devil up, that I hate to ask any more favors, but there are a few more thanks due. In the first place I am under many obligations to Mr. J. F. Smith, who so kindly gave us the use of his photograph gallery and furnished lights for the three nights we were unable to get the opera house; to Miller & Vidal for their kindness in handling the reserved seats; to the stage hands who volunteered their services; to Mr. Burkhim, for favors, and all others who in anyway aided us. My especial thanks to Mrs. F. T. McCormick and Mrs. Ernest Molnar, for their assistance in dressing "Charley's Aunt."

Yours thankfully,

THEO HUDGINS.

Famous Johnny J. Jones Carnival.

Gainesville is to be given a treat in the shape of the Johnny J. Jones Exposition Shows and Great Trained Wild Animal Exhibit for nearly a whole week.

Their special train will arrive here from Tallahassee tomorrow at 12:35 p. m. and all the many various attractions will be thrown open to the public on Tuesday, January 19th, at 1 p. m.

This is the largest and best attraction of its kind that has ever visited Gainesville, and a delightful feature of the whole aggregation is the utter absence of anything questionable. There are no "Oriental" or other dances, and no gambling devices.

The feature attraction will be the Great Trained Wild Animal Show, which consists of a score of the finest specimens of Bengal tigers, lions, leopards, hy-breds, Polar bears, hyenas, black bears, Siberian wolves, etc., all trained to perform. A feature with this attraction that will please the ladies and little ones is six baby lions, only four weeks old.

Among the other many attractions will be found "Marshall's Ye Old Plantation," with twenty-two all-star performers and their own brass band of fifteen pieces; "Osarf," with the Majestic Theatre; "A Trip from New York to the North Pole," direct from Crystal Palace, London, England, which is really wonderful.

"Jones' Electric Palace," showing the latest works of the master mind—Edison.

"Amy," largest lady in the world, weighing over 600 pounds.

"King and Queen," largest snakes in the world.

"Penny Arcade," where all can have a good time for a small sum.

World's Fair Ferris Wheel, twentieth century merry-go-round, and that wonderful riding device known as the "Ocean Wave," and hundreds of minor attractions.

Vittucce's Royal Italian Band, which has a National reputation, will give concerts daily, both on the square and at the carnival grounds.

Special attendants are engaged to look after the comforts of the ladies and children.

The carnival will be located on the old show grounds near Union Academy, on East Main street N.

Electric Theatre.

From time immemorial music has wielded an influence upon the people marvelous in its intensity. The tired or panic-stricken soldier is wrought up to greater exertions and renewed courage by the martial strains of his country's songs. "Music hath charms to soothe the savage breast," and still more, to cause us to weep or laugh. The same with first-class moving pictures—they exhibit such realistic scenes that, voluntarily, those witnessing are led to applaud the good, censure the villain, or weep with the suffering.

The moving pictures exhibited at the Electric Theatre are of the finest, most expensive make, the majority being made in and imported from Europe, and those to be shown during the coming week, are all new subjects of great interest.

The Electric Theatre as a home undertaking deserves the unstinted patronage of our citizens, which it is getting.

UNIVERSITY NOTES

Next Tuesday morning at 9 o'clock the ladies of the Kirby Smith Chapter, U. D. C., will present portraits of Jefferson Davis and Robert E. Lee to the University. The exercises will include several musical selections as well as the speeches of presentation and acceptance. Transportation from the square to the University will be provided, the conveyances being marked by the college colors. The public is cordially invited to be present. As the speeches will be of a fine order, and as this is a very fitting method of celebrating Lee's birthday, there will be without doubt a large attendance.

Capt. Cox and a party of engineering students left Friday for Ocala. The party will make surveys seeking to determine the best route for a good rock road to connect Gainesville and Ocala. They will also seek to locate the places where good material for road-building can be found. Similar surveys will likely be undertaken until they have mapped out a plan for a systematic network of hard roads to extend throughout the State. This work will be of great practical benefit to the civil engineering students. It is hoped that other benefits will be derived from it. If the plan is carried out successfully it will be of great service to the various counties, especially as it will help to systematize the road-building.

A great educational gain is hoped also for the rural schools. Good roads will help to improve all the country schools, inasmuch as they make possible school consolidation. The work will also inure to the benefit of the farmer and will tend to increase his financial profits. His gain will be followed by improvements in the schools—a matter in which the University is deeply concerned. The work is undertaken in co-operation with the State geological survey. A full account of it will be found in the next issue of The University Record, a copy of which will be sent to anyone upon application.

Another section of the next issue of The University Record will describe the equipment of the department of electrical engineering. This department is now prepared to develop students into practical electricians. This will naturally interest the management of electrical plants. The department desires to get into touch with all the power houses in the State.

The students have greatly enjoyed the visit of Mr. W. D. Weatherford of Nashville, Tenn., traveling secretary of the Student Y. M. C. A. He made several talks about the best methods of carrying on the work of the association here, and his visit has undoubtedly added greatly to the effectiveness of the workers among our students.

The examinations for the first semester begin on January 28, and will continue for a week.

Prof. S. M. Tracy of Biloxi, Miss., will shortly pay the University a visit. Mr. Tracy is one of the oldest and best-known botanists in the United States. He was the first professor of botany at the Michigan Agricultural College, and has held official positions for nearly half a century. More of his graduates hold official positions as botanists than can be credited to any other teacher. At present he is engaged principally in experiments intended to show what feed and forage plants can be successively and profitably introduced into the South.

Director P. H. Rolfs of the Experiment Station has just returned from the sub-peninsular region. His trip was made to investigate further certain diseases of citrus trees.

Prof. Scott is proud of the three-fourths grade steer recently presented to the station by Mr. Chambliss of Ocala. The young animal is a model of what can be raised in Florida pastures. He will be used to exhibit the advantages of thoroughbred sires.

Prof. Blair has recently returned from the East Coast, where he is carrying on extensive investigations of the best methods for raising pineapples.

Prof. Winter is visiting the Manatee and Sanford districts, investigating the condition of the celery crop.

The Experiment Station is setting out a selected lot of citrus trees.

Mr. Hamilton, laboratory assistant to the plant pathologist, has resigned. He will leave at the end of the present semester.

At the last meeting of the Athenaeum Club the paper was read by Dr. Crow, his subject being "Causes of the Reformation in Germany." Officers for the year 1909 were elected: Dr. E. R. Flint, president; Dr. J. M. Farr, vice-president; Prof. John Belling, secretary-treasurer.

Prof. Fawcett of the Experiment Station is enjoying a two-weeks' vacation. He will visit his old home in Salem, Ohio.

Will Drain Lands.

Surveyor J. W. Patton has just returned from Micanopy, where he has been engaged running off the large tract of land formerly owned by the Powell estate. The land has been purchased by G. H. Snyder & Co. of New York, and it is understood that they will drain one of the large lakes on the tract and use the place for a vegetable field. The tract comprises 1,400 acres and the lake they will drain is about a 50-acre one, which is said to be the finest muck land in the State.

The Meanest Man in Town

Is the one who always wears a frown, is cross and disagreeable, and is short and sharp in his answers. Nine cases out of ten it's not the poor fellow's fault, it's his liver and digestion that make him feel so miserable—he can't help being disagreeable. Are you in danger of getting into that condition? Then start at once taking Ballard's Herbine for your liver—the safe, sure and reliable vegetable regulator. Sold by W. M. Johnson.

CONFEDERATE BALL BY KIRBY SMITH

WILL OCCUR AT ELKS' HOME ON TUESDAY EVENING.

Prices of Tickets Will be $2, Which Admits Couple With Dancing Privileges—Onlookers 50c.

The Confederate Ball which is to be given under the auspices of the Kirby Smith Chapter at the Elks' Home on Tuesday evening promises to be the greatest society event of the season.

This event has been quietly gotten-up by the ladies of the chapter who have been giving entertainments for the past several years, and that they will make a success of the affair no one doubts in the least, for the advance sale of tickets has already proven satisfactory.

The price of tickets has been put at a nominal rate of $2, which entitles one couple to admission with dancing privileges, and all visitors to the city will be admitted for the small sum of 50 cents per couple.

The event is given on the birthday of Gen. Robert E. Lee, and parties not already having tickets can secure them at the store of Miller & Vidal.

Music for this occasion will be furnished by the Gainesville orchestra, which is now among the best in the State.

SANITARIUM NOTES.

At a recent meeting of the stockholders of the Sanitarium Association the following officers were elected: President, J. B. Padgett; vice-president, T. W. Shands; secretary and treasurer, J. H. Hodges; directors, T. W. Shands, J. B. Padgett, J. H. Hodges, M. H. DePass, T. F. Thomas. Dr. J. H. Hodges was re-elcted medical director.

The Sanitarium inaugurated a modern and thorough system of bookkeeping the first of the year, and all records of the business affairs of the institution are kept with as much system as those of a bank.

Mrs. Susan Bradley, the efficient head nurse, made a flying business trip to Jacksonville Wednesday.

Dr. R. Y. H. Thomas of Jacksonville was a recent visitor at the Sanitarium.

Dr. and Mrs. McMillan of Morriston were visitors to the Sanitarium Friday. They brought with them Miss Inez Hunter of the same place, and left her at the Sanitarium for treatment. Miss Hunter was operated on on the following day by Dr. DePass and is now convalescent.

C. A. dePoix, a prominent naval architect of New York, arrived Saturday and will remain under treatment at the Sanitarium for several weeks.

Mrs. L. M. Simpson of South Weymouth, Mass., will arrive at the Sanitarium today and remain for some time, or until her health improves.

Don't Take the Risk.

When you have a bad cough or cold do not let it drag along until it becomes chronic bronchitis, or develops into an attack of pneumonia, but give it the attention it deserves and get rid of it. Take Chamberlain's Cough Remedy and you are sure of prompt relief. From a small beginning the sale and use of this preparation has extended to all parts of the United States and to many foreign countries. Its many remarkable cures of coughs and colds have won for it this wide reputation and extensive use. Sold by all druggists.

Her Lucky Number.

The byways as well as the highways of church life furnish much in the way of wit and humor. What, for instance, could be more mirth provoking than the naive confession of the cook of a London vicar who, being allowed to choose a hymn for the family prayers, was complimented on her choice by the vicar's wife?

"What a nice hymn you chose," said the latter to the cook.

"Yes, mum; it's the number of my policeman."

STATE CONVENTION ANTI-SALOON LEAGUE

WILL BE HELD AT JACKSONVILLE FEBRUARY 9TH AND 10TH.

Hon. Seaborn Wright of Georgia and Dr. Baker of Ohio Will Be Among the Speakers.

JACKSONVILLE, FLA., Jan. 16.—The annual convention of the Florida Anti-Saloon League will be held at Jacksonville on Tuesday and Wednesday, February 9th and 10th. The first session will be held on Tuesday evening and there will be three sessions Wednesday.

Besides many State speakers special addresses will be given by Hon. Seaborn Wright of Georgia and Rev. Purley A. Baker, D. D., of Ohio, general superintendent of the Anti-Saloon League of America. These gentlemen are orators of the best type and the people of Florida are to be congratulated upon this opportunity of hearing them both together.

The public is most cordially invited to be present at the sessions of this convention. Its deliberations will be in the hands of delegates to be elected by the churches and allied organizations of the State. Each church, young people's society, Sunday school and each local temperance organization in the State is entitled to two delegates, and this notice is a formal request that such organizations at once elect delegates and furnish them with proper credentials. Let us make this convention a big success.

A feature of the meeting will be a full discussion of the best ways and means of promoting the present fight of the Anti-Saloon League for State prohibition. Coming as it does, just before the meeting of the Florida Legislature, friends of our cause can make this convention a means of large influence toward securing proper legislation. Plan now to attend.

CHARLES L. COLLINS,
State Supt. F. A. S. L.

SAVED FROM AN OPERATION

By Lydia E. Pinkham's Vegetable Compound

Louisville, Ky.—"Lydia E. Pinkham's Vegetable Compound has certainly done me a world of good and I cannot praise it enough. I suffered from irregularities, dizziness, nervousness, and a severe female trouble. Lydia E. Pinkham's Vegetable Compound has restored me to perfect health and kept me from the operating table. I will never be without this medicine in the house."—Mrs. SAM'L LEE, 3523 Fourth St., Louisville, Ky.

Another Operation Avoided.

Adrian, Ga.—"I suffered untold misery from female troubles, and my doctor said an operation was my only chance, and I dreaded it almost as much as death. Lydia E. Pinkham's Vegetable Compound completely cured me without an operation."—LENA V. HENRY, R. F. D. 3.

Thirty years of unparalleled success confirms the power of Lydia E. Pinkham's Vegetable Compound to cure female diseases. The great volume of unsolicited testimony constantly pouring in proves conclusively that Lydia E. Pinkham's Vegetable Compound is a remarkable remedy for those distressing feminine ills from which so many women suffer.

The Pure Food Law.

Secretary Wilson says: "One of the objects of the law is to inform the consumer of the presence of certain harmful drugs in medicines." The law requires that the amount of chloroform, opium, morphine, and other habit-forming drugs be stated on the label of each bottle. The manufacturers of Chamberlain's Cough Remedy have always claimed that their remedy did not contain any of these drugs, and the truth of this claim is now fully proven, as no mention of them is made on the label. This remedy is not only one of the safest, but one of the best in use for coughs and colds. Its value has been proven beyond question during the many years it has been in general use. For sale by all druggists.

TOM BRISBAN GOES UP.

Justice Carlisle Sends Him Up for Four Months.

Charged with the larceny of money from his wife, the exact sum being $3.45, Tom Brisban was Saturday given four months by Justice Carlisle.

Brisban has figured in the courts a great deal for the past few weeks, and it seems that his last drunken spree will cost him four months of hard work, as he will be unable to find friends that will put up sufficient money to pay his fine.

Judge Carlisle only sentenced the prisoner to three months originally, but as he was leaving the room he turned to his wife and said: "You did me a dirty, mean trick." Whereupon the "Big Judge" said: "I will give you another month for that, making your sentence four months in default of $100 fine."

S.S.S. THE ONLY REMEDY FOR BLOOD POISON

S. S. S. is the one and only reliable and certain cure for Contagious Blood Poison. This claim is not based on the treatment of a few cases of the disease, here and there, but its success extends over a period of more than forty years, during which time thousands upon thousands have found a cure by the use of this great vegetable remedy. S. S. S. is first of all, an absolutely perfect blood purifier, able to go down into the blood and remove every particle of the virus of Contagious Blood Poison. It cleanses and purifies the circulation, and in this way removes the cause of the trouble. Then nature, assisted by a rich, healthy blood supply, quickly renovates and renews the system, while the symptoms of ulcerated mouth and throat, skin eruptions, discolored splotches, falling hair, sores and ulcers, etc., disappear, leaving the body entirely free from the effects of this insidious poison. When S. S. S. has thoroughly cleansed and purified the circulation there is no danger of any future outbreak—the blood is pure and the cause of the disease entirely removed. Home Treatment Book containing many valuable and helpful suggestions for those who are curing themselves with S. S. S., and any medical advice desired sent free to all who write.

Funeral of Miss Mixson.

The funeral services of the late Miss Rosebud Mixson was largely attended Saturday, being held from the First Baptist church, Rev. S. B. Rogers officiating.

The remains were laid to rest in Evergreen cemetery in the family burying ground there, a large concourse of sorrowing friends following the remains to their last resting place.

Fever Sores.

Fever sores and old chronic sores should not be healed entirely, but should be kept in healthy condition. This can be done by applying Chamberlain's Salve. This salve has no superior for this purpose. It is also most excellent for chapped hands, sore nipples, burns and diseases of the skin. For sale by all druggists.

For City Marshal.

The Congress discussion "what shall we do with ex-Presidents?" has turned on what can we do "to" our incumbent President?

This country is not the only nation in the billion dollar class. The annual budget of Great Britain is rapidly approaching that figure. It costs money to cut a wide swath.

The State of Minnesota, which has just passed the fifty-year milestone, has increased in population in round numbers from 150,000 to nearly 2,000,000, and in taxable wealth from $30,000,000 to approximately $1,000,000,000.

The Assistant Attorney-General who proposes to fatigue the Standard Oil Co. by making the fine $40,000,000 next time will put enough money into the treasury to pay the national debt if he can arrange for a sufficient number of reverses and cumulative fines.

An organization of leading negroes of South Florida has been formed at Tampa for the purpose of preparing an exhibit of the products of the negro race for the State Fair, in response to an invitation from the fair management. Liberal space will be assigned for this exhibit, in order to encourage the colored people of Florida engaged in useful pursuits. The organization of negroes is making efforts to have Booker T. Washington deliver an address to them during the fair.

Shipments of cigars from Tampa for the first week in January were more than double those of the same week of last year, showing that the trade begins the new year under much improved conditions. The withdrawals for immediate consumption indicate a maintenance of business on an encouraging plane—possibly a trifle lower than in the early portion of 1907. All conditions remain favorable except the general business state of the country, which is adverse to a booming business—as the country is not apparently very flush with the spending money which goes for cigars and other extras. Tampa will have to wait the revival at large with the consciousness of being fully ready to take every advantage of it when it does come.—Tampa Times.

The national sanitarium of the Modern Woodmen of America, located on a 1,000-acre tract nine miles north of Colorado Springs, Colo., is at last an accomplished fact. The first tent colony, with 60 patients, was opened last week. Other patients will be admitted as rapidly as accommodations are provided. If necessary, the sanitarium will ultimately have a capacity of 500 or more patients. Several of the local camps have adopted the plan of building and furnishing a tent cottage. The executive committee of the home has decided to conduct the sanitarium free to all members afflicted with tuberculosis, but will admit only those who are deemed curable or whose lives will thereby be prolonged for a considerable length of time. This decision is based on experience which teaches that the person coming to Colorado in the early stages of the disease has everything in his favor, while those who wait until the last stages before coming to the higher altitude and land of sunshine have the odds against [illegible]

POWER FROM ARTESIAN WELLS.

The use of artesian wells for power purposes is a practice growing rapidly in the Mississippi Valley, declares the February Popular Mechanics in an illustrated article. Georgia, it is said, has 400 such wells, some of which furnish power to run small mills. Artesian wells furnish fire pressure for one Mississippi city, also. The article states:

"At present there are within the corporate limits of Savannah no less than 50 artesian wells, and it is doubtful if any city in the South has a more complete or wholesome water supply. The water is at present obtained from 13 wells, all of which are 12 inches in diameter. These wells vary from 475 to 700 feet in depth, and supply the city with 7,000,000 gallons of pure crystal water daily. They are located along an irregular line about one hundred yards apart, the water flowing into a common aqueduct which has a sufficient grade to carry the water with considerable current to the pumping station.

"The sanitary effect of the artesian waters on the general health of the towns, cities, and communities where they have been used for a number of years is excellent, materially lessening the prevalence of chills and fevers in Southern Georgia. The little city of Albany is a fine example. It has a population of about 15,000 and is situated on the banks of the Flint river with numerous swamps and lowlands near by. Before the completion of the artesian wells the drinking water was obtained from shallow surface wells, and the city was considered one of the most unhealthy in Georgia. New Albany, with the sanitary conditions further improved by drainage, is considered almost a health resort. The communities of Brunswick, Bainbridge, Leary and Fort Gaines have experienced similar results."

COOKING BY ELECTRICITY.

Modern methods of cooking by "electric juice" and push buttons will be features of the National Electric Show installed in the Coliseum, at Chicago, Saturday and which will continue in progress during the balance of January.

The show will demonstrate that breakfast these days, in the modern nome, is merely a matter of pushing the button. The latest of the breakfast utensils is the electric toaster. This device is inexpensive and most efficient. The bread to be toasted is placed in a vertical position on either side of the heating element. By this method the bread is not burned as it is in horizontal toasters.

In the electrical show exhibits electrical cooking will be demonstrated to show that it is not only feasible but practical and economical as well. The electric oven will turn out brown biscuits, baked to perfection; the coffee percolator shows what modern methods can do for an ancient beverage.

A glimpse of the demonstrator preparing a meal on the electric stove will, it is said, convince the most skeptical that electric cooking is the most up-to-date way. There is no dirty coal to handle, no flying ashes, no soot and gases or other kitchen evils of that kind. A turn of a switch and the heat is there.

Seven weeks is not time enough for the habit of calling down the President to become chronic, although the big stick can swish even in that brief period.

CURRENT COMMENT.

The Louisville Courier-Journal says: "State and Federal forestry projects should be mutually helpful. The publicity given to the Federal government's work upon the timber problem is gradually awakening the people to a sense of the importance of conservation. A little education nearer home in the form of State forestry might materially aid in creating public opinion favorable to a broader treatment of the subject by Congress."

The Chattanooga Times (Dem.) says: "Mr. Taft deserves well of the South. He has been perfectly frank in all his utterances with reference to this section, its people, its policies and its institutions. He has frankly said that he would like to see the breaking up of its political solidarity during his administration. He has made no ulterior promises as to what he is going to do to help on that condition; he certainly has not justified those of our contemporaries who have taken alarm in saying that he proposes 'to buy us with patronage' and 'divide us by a judicious division of spoils,' as more than one has intimated he is planning to do. In reality Mr. Taft has nowhere and at no time shown any disposition to become his party's purchasing agent."

The Indianapolis News says: "We all agree that we ought to have the cheapest possible service that can be efficienty supplied. And, in our opinion, there is little reason for a general advance in freight rates. But at the same time fair-minded people will have to admit that a government which, by its legislation, adds heavily to the cost of constructing and operating railroads, and which, in the face of that increase, attempts to force a reduction of transportation charges, occupies a somewhat inconsistent position. Yet that is the position which our Government occupies. Deliberately to create a regime of high prices, and then to whine because the railroads maintain high charges for their service, is altogether absurd. To this extent the plea of President Brown must be allowed. Yet President Roosevelt has no interest in the tariff question, no interest in relieving the people and the railroads alike from the burden of taxation. He has precious little interest either—during campaigns—in this matter of railroad charges."

HEALTHY PLANTS

Require the Most Careful Attention as Well as Good Soil.

Did you ever see a rosebush which—despite the most beneficent environment of soil—of sunshine—and of atmosphere,—seemed never to achieve a healthy growth.

A ton of manure will not help a plant that has a canker eating out its heart.

You must destroy the cause before you can remove the effect.

You cannot cure Dandruff and Baldness by rubbing on hair lotions, and rubbing in vaseline, etc.

You must look to the cause of the trouble—it's a germ at the roots of your hair which causes it to fall out.

Newbro's Herpicide destroys the germ, and healthy hair is the sure result.

HER MISTAKE.

The Way It Was Explained to Her by the Clumsy Man.

Owing to the fact that the car lurched suddenly as he was passing along the aisle Bronson was deprived of his balance, with the result that in attempting to save himself from falling he clutched one of the shoulders of a handsome woman who had succeeded in getting a seat. Moreover, he knocked her beautiful hat awry and with great difficulty avoided stepping on her toes. As he succeeded in recovering his equilibrium the lady turned toward him and said:

"You contemptible pup! I wish you to understand that I am not a lamppost or a piece of furniture to be clung to for support. You ought to ride in a cattle train. You have no right to crowd in where you can tear other people to pieces with your big, awkward hands. You pitiful clown! You ought to be thrown out into the street. You are not fit to be allowed to go where you are likely to interfere with the comfort of refined people. You unmannerly bumpkin! You deserve to be"—

"Excuse me, madam," Bronson managed to say, "you have made a mistake."

"A mistake!" the lady demanded, her eyes flashing with wrath. "What do you mean?"

"I am not your husband."—Chicago Record-Herald.

Stomach Trouble Cured.

If you have any trouble with your stomach you should take Chamberlain's Stomach and Liver Tablets. Mr. J. P. THE CLERMONT.

First Passage by Steamboat From New York to Albany.

In August, 1808—the exact day is a matter of dispute—the steamboat Clermont made the first passage by steam from New York to Albany. The distance, somewhat less than 150 miles, was covered in thirty-two hours, a record hailed as a triumph in speed, for previously the passage between the two cities averaged four days.

Robert Fulton had experimented with steam several years, but the Clermont was the first boat he constructed on a large scale. As he could not get the engine he wanted in this country he ordered one from England. The Clermont was so reconstructed in the following winter that it gave more commodious accommodations to travelers, and the year 1808, which was the first year of regular travel by steamboat, Fulton made it a point to start his boat precisely on scheduled time. Curiously enough, a portion of the public complained of this. It was not until well along in the summer that travelers got accustomed to it. Previously boats had been held for two hours at the request of passengers who weren't ready. Fulton's perseverance won public approval before the season closed.—Anaconda Standard.

Simple Remedy for La Grippe.

Racking la grippe coughs that may develop into pneumonia over night are quickly cured by Foley's Honey and Tar. The sore and inflamed lungs are healed and strengthened, and a dangerous condition is quickly averted. Take only Foley's Honey and Tar in the yellow package. J. W. McCollum & Co.

A Dead Bird.

Samuel Butler, the witty but eccentric author of "Erewhon," which means "Nowhere," and of many other remarkable and suggestive books, is now more read than during his lifetime. He died in 1902. In one of his notebooks he tells this incident, which must have amused the great Charles Darwin:

"Frank Darwin told me his father was once standing near the hippopotamus cage when a little boy and girl, aged four and five, came up. The hippopotamus shut his eyes for a minute. "'That bird's dead,' said the little girl. 'Come along.'"

How to Make a Cup of Cocoa.

Take a tablespoonful of cocoa and put it in a tin cup. Add one teaspoonful of granulated sugar and one tablespoonful of boiling water. Mix well, so that there will not be any lumps of cocoa. Pour a little less than one-half pint of milk into a saucepan and cook it, stirring all the time, until it is scalded—that is, until a film forms on it and it begins to bubble a little. Stir the cocoa mixture into this and cook until it boils up.—Delineator.

Every Mother

Is or should be worried when the little ones have a cough or cold. It may lead to croup or pleurisy or pneumonia—then to something more serious. Ballard's Horehound Syrup will cure the trouble at once and prevent any complication. Sold by W. M. Johnson.

There is no case on record of a cough, cold or la grippe developing into pneumonia after Foley's Honey and Tar has been taken, as it cures the most obstinate deep-seated coughs and colds. Why take anything else? J. W. McCollum & Co.

TELEPHONE TALKS

The Long Distance System

One of the most valuable features of our service, to our subscribers and to the public generally, is our connection with the extensive long distance lines of the American Telephone and Telegraph Company and the other associated Bell Telephone companies.

We own thousands of miles of long distance lines in the seven States in which we operate and in addition can connect any telephone in our system with lines extending to any other city in which a Bell Telephone system is operated.

These long distance lines are of the most modern and improved construction and are maintained at a high state of efficiency. The Bell systems, operating in various sections of the country, are uniform in their equipment and in their methods of operating.

Only by reason of this close traffic arrangement between the Bell Telephone companies is it possible to go to a Bell Telephone almost anywhere, ask for "Long Distance" and be put in communication with almost any point in the country.

This vast network of wires, radiating throughout the nation, is used daily in commerce and for social purposes by the banker, the farmer and citizens in all walks of life and our plant here is an important link in this great chain.

NEWS FROM ALL PARTS OF FLORIDA

The seventeenth annual council of the Episcopal Missionary Jurisdiction of Southern Florida was in session the past week in Tampa.

Three Greeks were arrested in Pensacola last Sunday for shining shoes and are held under bond to appear before the criminal court next term. The arrests were made by the sheriff enforcing the Sunday blue laws in that city.

It is more than probable that the Merchants and Miners Transportation Company of Baltimore will soon make Jacksonville a port of entry for its magnificent fleet of ships. The company has purchased valuable property on the river front.

That Fernandina's public building will be begun and completed at no far distant day is no longer mere conjecture, but to the delight of our people it has been decided by those having it in charge that work will be begun in the spring and pushed to completion as rapidly as the work can be done. Postmaster Oakes of this city is in receipt of a letter received a few days ago from Supervising Architect stating that the plans will be completed in early spring of this year and that immediately thereafter bids would be received for the construction of the building. Not only that but the contract will be let with the understanding that the work is to be begun at once and pushed to completion.—Fernandina Record.

On last Friday morning while T. B. Owens and Benny Hoskins were driving, they were met on the road near Haywoods, on Chattahoochee river, by Peter Henry, a negro of more than middle age, who asked Owens what right he had to take his corn (which had been attached and taken for debt) and at the same time began taking from his bosom a revolver with which he fired one shot at Owens as he alighted from his buggy. Owens then fired five shots with a Winchester at the negro, the shots taking effect as follows: One in the leg, three in the body and one in the face, either of which would have killed the negro, except the one in the leg. The negro fell and died immediately, still gripping tightly, with both hands, his old-fashioned five-shooter, cap and ball revolver. Owens, as soon as he could reach a telephone, reported to the sheriff what had occurred, when County Judge Williams and Deputy Sheriff Lewis went to the scene. A coroner's inquest was held, the verdict of the jury being justifiable homicide. —Marianna Times-Courier.

WOMAN'S WOES.

Gainesville Women Are Finding Relief at Last.

It does seem that women have more than a fair share of the aches and pains that afflict humanity; they must "keep up," must attend to duties in spite of constantly aching backs, or headaches, dizzy spells, bearing-down pains; they must stoop over, when to stoop means torture. They must walk and tend and work with racking pains and many aches from kidney ills. Kidneys cause more suffering than any other organ of the body. Keep the kidneys well and health is easily maintained. Read of a remedy for kidneys only that helps and cures the kidneys and is endorsed by people you know.

Mrs. L. deYampert, living at 107 W. Arlington street, Gainesville, Fla., says: "My kidneys had been in a disordered condition for some time, and I was unable to find anything to give me relief. My back ached severely, and I was subject to dull headaches, very dizzy at times and frequently troubled with chills. There was a continual feeling of lassitude and the slightest work left me completely tired out. I decided to give Doan's Kidney Pills a trial and procured a box at J. S. Bedford & Co's drug store. They entirely banished the pains and aches, and I am today enjoying perfect health."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

GILA MONSTER'S BITE.

The Reptile Turns Over to Get Venom Into Its Victim.

It was his turning over habit that led me to the discovery as to the bite of the Gila monster. This creature, more like a short, stocky snake with legs on than anything else, has no poison fangs, like the rattlesnake, yet his bite may be just as dangerous. His poison teeth are in his lower jaw, and the poison comes from a gland under the tongue. If he bites without turning over the wound is not serious, but if he turns over there is great danger.

Dr. Snow of the University of Kansas wrote me some time ago of an experience he had with the bite of a Gila monster.

The reptile was caught and put in a bucket, the top of which was covered with paper. The bucket was then put in the wagon in which the doctor was driving. As the road was somewhat rough, the bucket was bounced up and down, and in order to steady it Dr. Snow put his hand behind him and took hold of the bucket, thrusting his fingers through the newspaper cover on its top so that he could hold it secure. Suddenly he felt the monster's grip on his fingers. Startled and somewhat alarmed, he carefully pried the jaws of the reptile open and released himself. The wounds were such as any ordinary bite would have made, and he suffered no more inconvenience than might have been expected.

There are many stories current in Arizona and Sonora as to deaths that have occurred from Gila monsters' bites, but it is hard to get at the facts. Careful experiments made with animals show that when the reptile bites and turns over, so that the poison flows down the tooth grooves into the wound, the bitten creatures die in a short time.—Suburban Life.

Scientific Spanking

Consists in punishment only when a child is actually bad. Some mothers think that all crying is badness—it's not. When your baby cries, look for pins or some external cause; if you can't find them give the baby White's Cream Vermifuge, as the chances are it is suffering from worms which keep it hungry and cross all the time. Pleasant to take—sure in its action. Price 25 cents. Sold by W. M. Johnson.

The Devil's Knell.

Among the famous bells of Dewsbury, Yorkshire, England, is one known as "Black Tom of Soothill," which was presented to the church in expiation of a murder. "Black Tom" is always rung on Christmas eve. Its solemn tolling as it strikes the first tap at exactly midnight is known all over Yorkshire as the "devil's knell," it being the notion that when Christ was born the devil died.—London Standard.

You would not delay taking Foley's Kidney Remedy at the first sign of kidney or bladder trouble if you realized that neglect might result in Bright's disease or diabetes. Foley's Kidney Remedy corrects irregularities and cures all kidney and bladder disorders. J. W. McCollum & Co.
